

January 25, 1923. Had Mr. Parker on the telephone at Mount Holly, N.J., and arrangement made for me to proceed to Mt. Holly so that I might be there by January 30th.

Mrs. Mrs. Paul Bonner of #829 Park Avenue, New York City, received a description of Mr. Hall's watch. She described it as a Gold Hunting Case Watch about eighty years old, Engine Turned; it had been a Key Winder and was changed to a Stem-Winder, the Gold on the Stem is different from the Gold on the Case.

Mrs. Frank D. Vorhees of #85 Gifford Ave., Jersey City, M.J., gave me about the same description of Mr. Hall's watch as did Mrs. Bonner. She said that the watch was given to Mr. Hall by a Mr. Friedman, who had lived in Newark, N.J. at that time, but he has no relatives living now by which it may be traced. They do not know of any place where it had been repaired.
